ABOUT

Ready to take on responsibility as an application developer, with AI among my everyday tools, available immediately

An autonomous application developer, I turn real needs into software delivered to production, from frontend to infrastructure. I've already put my skills to work on client mandates and my own projects, and I'm continually looking for new challenges to grow. Initiative, persistence, curiosity and command of today's tools — AI in particular — are at the core of how I work.

PROFESSIONAL EXPERIENCE

PROFESSIONAL MANDATES

VRD - Ingénieurs conseils

August 2026 — Present

Web developer — company website

- Six-page company website for a building-services (HVAC) engineering firm: Next.js 16 / React 19, strict TypeScript, every route prerendered.
- Zero runtime dependencies beyond next/react — in-house design system (tokens, self-hosted typography), no CSS framework and no animation or icon library.
- Accessibility enforced by CI: a blocking WCAG AA contrast audit in the typecheck → lint → contrast → build chain.
- Signature hero: an anthracite plate pierced by the monogram through an SVG mask on scroll — constants measured (rasterisation limits), not guessed.

Next.js 16 • React 19 • TypeScript • CSS Modules • Vercel

R2JC

June 2026 — August 2026

Web developer — client mandate

- Full redesign (design + engineering) of a fashion collective's bilingual FR/EN showcase site, taken to production in 6 weeks on an already-live site edited in parallel by the client.
- Audit of the existing site and a bespoke hybrid architecture working around free-Elementor limits: pixel-perfect design while keeping every text client-editable.
- Automated the team's workflow: auto-generated annual editions, a logo manager, secure forms (REST, HMAC, anti-spam) and a PHP plugin that detects broken translations.
- Performance optimization with no visual compromise: image weight cut 3—6×, server response time down by two-thirds (≈ 320 → 110 ms), zero regressions.
- Ongoing coordination with the team (clarifying needs, follow-up, adjustments) and full documentation: the collective now maintains the site without a developer.

WordPress • PHP • REST API • JavaScript • modern CSS

Magneticlab - XEFI Neuchâtel

May 2026

Developer — freelance mandate

- Odoo 19 Enterprise addon (pixieset_sync) + Chrome/Firefox extension for a Swiss photography studio.
- Automated Pixieset → Odoo sync (contacts, projects, sessions), daily cron, masked secrets.
- Delivered solo, 4 batches in 18 days, live on Odoo.sh — client satisfied.

Python 3.12 • pydantic v2 • pytest • Manifest V3

TECHNICAL SKILLS

AI / LLM

Claude • Claude Code • ChatGPT • Prompt engineering • Classification LLM • Agents LLM • LLM evals

LANGUAGES

HTML • CSS • PHP • C# • SQL/NoSQL

SOFTWARE

Vercel • GitHub/Git • Microsoft 365 • VS/VS Code • WordPress • Krita • DaVinci Resolve

DISCIPLINES

OOP (object-oriented programming) • UI/UX • API integration • Debugging & testing • Hardware/software maintenance • Web design • Project management (solo)

LANGUAGES

French	Native
Italian	Native
English	C1
German	B2

PERSONAL SKILLS

Autonomy • Initiative • Rigor & attention to detail • Solution-oriented • Persistence • Curiosity / fast learner • Team player • Receptive • Innovative / creative • Critical thinking

PROJECTS & ENTREPRENEURSHIP

Ordine AI

2025 — Present

Founder & developer

— AI multi-provider email client for Swiss SMEs, designed and shipped solo — in active beta.

— Claude Haiku classification pipeline (CI harness FR/DE/IT/EN: 100/94/96/98%) and FADP compliance (Swiss/EU residency, AES-GCM-256 encryption, Swiss PII DLP).

— 4-tier Stripe billing and a self-run adversarial security audit (5 LLM agents, 30+ findings resolved).

FastAPI • Next.js • TypeScript • Supabase • Claude API • Stripe • Cloud Run

PERSONAL PROJECTS

CPNE-TI — Final Project

April 2025 — June 2025

Final training project (TPI)

— Digitized version of "Guess Who?" built in C#/Raylib.

— Unique character generation algorithm via DNA-profile comparison + a clothing rarity system.

— Grade: 5.5/6.

C# • Raylib

SourShots

2023 — Present

Visual content creation

— Creative contribution to a local band over 3 years: photos and visual demos for posts and announcements.

Krita

INTERESTS

Digital art • Photography • Electric guitar • Volleyball • Fashion

EDUCATION

Federal VET Diploma (CFC) in Application Development & Professional Baccalaureate

2022—2025

CPNE-TI — Neuchâtel

German language immersion certificate

2020—2021

School in Erlach — Bern

Neuchâtel cantonal diploma — PRIMA bilingual (FR/DE)

2018—2022

Le Landeron — Neuchâtel
